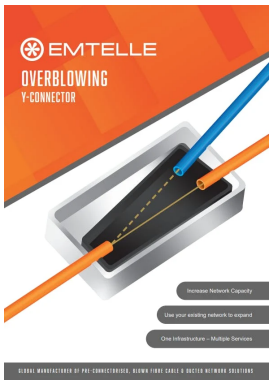
October Emtelle Newsletter

Overblowing Brochure



Overblowing is leagues away from any other fibre technology with regards to flexibility and capacity, allowing you to support various services from one core network.

Our new digital Overblowing Y- Connector brochure is now available on our website. You will find more about the benefits of overblowing and how the Emtelle 'FibreFast Overblow' system enables fibre capacity upgrades on a fully populated network with minimal disruption to existing customer optical traffic.

Overblowing Brochure

FibreFlow™: NEW & Improved Connector Range

These are the new version of Push-Fit connectors for blown fibre microduct systems. They are proven more effective in microduct to microduct joints and allow easy through-blowing of fibre unit or microcable without snagging.

Some features which stand out for this new version:

• Compact design in compliance with Telecom standards (e.g. Deutsche Telekom)

• Impact resistance according to EN61386-24:2004 and EN61386-1:2008

• Manufactured in compliance with the EN 50411-2-8.

FibreFlow™: MICRO Optical Distribution Box

Emtelle's MICRO Optical Distribution Box is the new indoor mountable box pre-connectorised with LC/APC Pigtails. They are ideally suited for indoor wall mount applications and fully customizable for different fibre capacities. The small box allows for easy fibre management with a swing splice tray and flexible cable entry for both microduct, cable and drop cable and is suitable for installation of blown fibre micro

cable up to 4f.

EXHIBITIONS

We want to take the opportunity to thank all our clients, prospective clients and business partners who came to see us and visited our booth at exhibitions and events across the

world. Thank you all for making it such a memorable few months by joining us and discussing your network rollout requirements! We are delighted by the many visitors who approached our booth to discover our easy-to-deploy fibre and why we remain the global leader in blown fibre & ducted solutions. For those who could not make it, we will continue to exhibit at exhibitions across all our regions, and we look forward to meeting you.

You can find out about all our upcoming exhibitions on our website;
https://www.emtelle.com/events/

CIGRE:

Paris, France

CIGRE: The number one global power system event in the world.

FRK-Breitbandkongress:

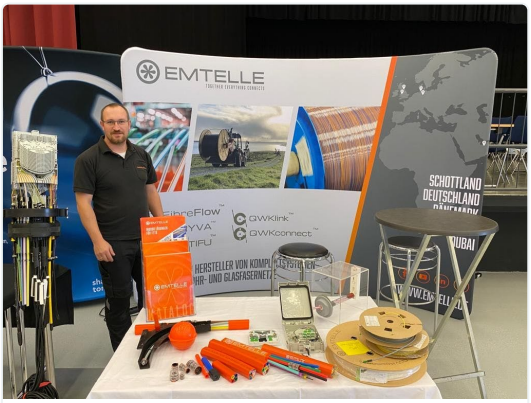
Leipzig, Germany

The 25th FRK Broadband Congress at the H4 Hotel in Leipzig.

Connected Britain

London, UK

The UK's most important connectivity event, bringing together the leaders



Kommunaler Breitband Marktplatz (KBM)

Osterholz- Scharmbeck, Germany

driving Britain's digital economy.

The 11th Municipal Broadband Marketplace served as an exchange and information platform for decision makers from politics, administration and municipal companies on all aspects of planning and implementing fibre optic.
